Thanks for getting back to me. Yes, that was quite a scramble; seems to be the norm these days. Thanks for taking time out of the meeting to handle this urgent request from the IOAA. **Deliberative Process / Ex. 5**

Sorry Steve. I couldn't figure out what edits you had made. When I had it in track changes I didn't notice it. John and I were both having issues with One Drive while we were at the meeting today.

Clean v2 attached. There's still a question about the date of the CASAC meeting. And do we all agree that the we are here is useful? The other idea would be to provide separately to IOAA and they can determine if it's useful.

I agree. I think it looks good. I think the only remaining revision is the one John noted. Probably best to say "PM2.5 remains the risk driver". The indicator part is not our call. OAQPS will make that statement in their documents.

I noticed Tara said the PM CASAC date was changed to 12-13. Is this correct? I had not heard that.

This looks great! In the attachment I added some revisions to smooth out language, but no substantive changes.

John, Steve, and Jason,

Lou has urgently asked for the 1-2 page (on the lower side better) summary/fact sheet of the PM ISA...by yesterday 😊. I gave Anna the PM ISA slides, along with some other materials that you all have been working on, she will take a stab at working on it this evening on her train ride home. That way, you can have something to react to in the morning. I am really sorry about all this.

Thanks!

Tina
